Recommendation letter

To Whom It May Concern,

It is my great pleasure to write this recommendation letter for Gexin Huang in support of his application for the PhD program. I am a full professor at the Center for Brain-Computer Interfaces and Brain Information Processing, South China University of Technology, where my research focuses on brain signal processing and machine learning. I have got acquainted with Gexin for nearly three years since he joined our group in 2018. At that time, he was admitted to our university with the top 5% score in the National Graduate Entrance Examination. After getting along, I found out that he is a modesty, industrious, and reliable person.

What impressed me most is Gexin's inquisitive mind and self-motivated learning, and his enthusiasm for machine learning. For instance, every time I met him at the school canteen, he would seize the opportunity to consult with me for the academic problems or technical issues he encountered recently. Moreover, Gexin always took every chance to attend the academic reports and conferences in colleges to exchange academic ideas with other professors.

Besides his graduate studies and research works, I have confirmed that Gexin is a warm-hearted and courteous student. He often devoted his spare time to help other lab members in need, such as reviewing their papers or coding program scripts. Also, Gexin enjoyed to share academic ideas and solve academic problems with others. He got used to writing technical blogs and study notes, like the customized usages of Tensorflow and Keras, the interpretation of machine learning algorithms, etc. These materials are extraordinarily helpful for junior lab members to quickly master the knowledge. I am so glad that he not only focuses on his individual growth but also delivers his best to help others.

Except for academic dedication, I am informed that Gexin has also engaged himself in a lot of association affairs and received multiple honors in different organizations. During his graduate period, he was responsible for the college's daily news and academic report summaries and finally received the honor of Outstanding Graduate Student Cadre, which was only awarded to 10 students in a college. Additionally, during his undergraduate studies and short working at Xiamen Airlines, he was bestowed with several honors like Outstanding Cadre of Student association, Excellent Student Cadre, Outstanding League Cadres, and the Excellent New Employee.

On hearing Gexin's plan to go abroad to further his study, I felt happy and would offer my support to his decision without reservation. I am sure that with the high-quality education of your esteemed university and his unremitting efforts, he will make achievements and contribute to the society.

Sincerely yours,

Professor
